**Mott Connell awarded Hong Kong sustainability framework contract**

Mott Connell Limited (MCL), the China based consultancy owned by Mott MacDonald and Connell Wagner, has been awarded a contract by the Hong Kong Government's newly formed Works Bureau to develop a sustainable construction management framework for all public works (civil engineering) projects in Hong Kong.

The first phase of work for the MCL project team will be conducting a review to find out what frameworks already exist in Singapore, Japan, UK and USA and looking for relevant contacts for collaboration. The second phase will involve engaging key stakeholders from the construction sector including developers, Legco representatives, academics and Government transport heads to ensure that the framework demonstrates best practice and has the industry's buy-in.

Dr Anne Kerr, Mott Connell's sustainability director said, "We are thrilled to be awarded this prestigious contract by Hong Kong's Works Bureau, we were up against some stiff competition but our excellent track record in delivering best practice in sustainable solutions around the world helped us to clinch the commission."
